

Please do not delay Local Number Portability any longer. My business needs require I maintain the same numbers to serve my customers. I have been stuck with the same wireless carrier for over 8 years and would like to take my numbers with me to any wireless carrier I choose. This does not mean I will switch carriers, but I should have to option to choose the company that offers the best coverage and features for my needs, without being forced to stay with a carrier that does not or will not fit my requirements as technology and my needs change.
